Step 1
assemble grow box, leaving out the planting shelf

Step 2
locate the circular connection on top of the rear grow box roof

Step 3
locate the extra large zip ties included & affix loosely to the eyelet connector on roof. Leave more than enough room to slip the filter in place see image 1

Step 4
place left side of filter through the zip tie on left and same for the right zip tie see image 1

Step 5
tighten zip ties easily and clip excess so that the filter is snug to the ceiling see image 2 & 3

Step 6
connect ducting and tubing with pipe clamps and your raptor is installed see image 4 & 5
